OBJECTIVE

Results-driven Full Stack Developer with expertise in the MERN stack and Python frameworks. I build scalable web applications, efficient RESTful APIs, and real-time features that improve user experiences. I excel at turning business needs into practical solutions through quick MVP development and reliable, production-ready systems. With a solid foundation in machine learning basics, I aim to blend data-driven insights into robust software engineering projects.

EDUCATION

Bachelor of Engineering - Electronics and Telecommunication, SPPU 2021 - 2025

Bharati Vidyapeeth's College of Engineering, Lavale, Pune

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Database Management Systems, Computer Networks

SKILLS

Programming Languages	Python, JavaScript, Java, TypeScript, HTML, CSS
Frameworks & Libraries	React.js, Node.js, Express.js, Angular.js, Django, Flask, Next.js, Socket.io
Databases & Caching	MongoDB, PostgreSQL, MySQL, Redis
Developer Tools	Git, VS Code, PyCharm, IntelliJ IDEA, Jupyter Notebook
Other Technologies	REST APIs, JWT, OAuth2, Celery, RabbitMQ, Apache Kafka, Nginx, WebSocket
Core Concepts	Data Structures, Algorithms, OOPs, Networking, DBMS

EXPERIENCE

Software Development Engineer August 2025 - Present
iauro Systems Pvt. Ltd. Pune, Maharashtra, India

- Architected and developed a real-time fiber optics monitoring platform processing thousands of events per second with sub-second latency
- Built scalable RESTful APIs using Node.js and interactive dashboards with Angular for live event visualization and system monitoring
- Designed event-driven microservices architecture integrating Apache Kafka for message streaming and Web-Socket for real-time data broadcasting to frontend
- Implemented end-to-end data pipeline consuming ML-processed events from Kafka, transforming data in Node.js, and delivering real-time updates via Socket.io
- Deployed production application with Nginx reverse proxy and secured backend code using PKG compilation, optimizing for performance and security
- Improved system performance by 40% through efficient data structures, connection pooling, and caching strategies

Software Engineer Intern February 2025 - August 2025
iauro Systems Pvt. Ltd. Pune, Maharashtra, India

- Contributed to enterprise-level software development projects using modern frameworks and technologies
- Developed full-stack features and gained hands-on experience with production-grade applications
- Collaborated with cross-functional teams to deliver high-quality software solutions

Freelance Software Developer November 2024 - Present
Stealth Startup Remote

- Led development of product platform, independently selecting tech stack and architecture

- Implemented real-time chat functionality using CometChat for optimized communication
- Built scalable backend APIs with Node.js and Express.js, managing complex data relationships
- Designed and developed responsive frontend interfaces using React.js with focus on user experience

Software Engineer Trainee

The Data Tech Labs Inc.

March 2024 - September 2024

Pune, Maharashtra, India

- Developed Marketing Automation Platform (MAAS) with campaign scheduling dashboard, improving client efficiency by 30%
- Built University Management System connecting students, teachers, and placement officers with automated notifications
- Created Product Management System with inventory tracking, enhancing accuracy by 25% and reducing waste by 15%
- Implemented scalable backend infrastructure using Django, Celery, and RabbitMQ for efficient task management
- Designed and developed user-friendly interfaces using React.js for multiple enterprise applications

PROJECTS

Advanced Delivery Time Prediction System. Developed an end-to-end machine learning solution for predicting delivery times by integrating historical records with real-time traffic and weather data. Utilized Python, CatBoost, Random Forest, Gradient Boost, Flask, and React.js along with APIs from TomTom and OpenWeatherMap to dynamically optimize delivery timing and scheduling. This project not only improved prediction accuracy significantly but also enhanced operational efficiency for logistics applications.

GDG Pune Official Website. Developed and maintained critical pages for Google Developer Groups Pune's official website using Nuxt.js and Vue.js. Created responsive and interactive designs for team member profiles and agenda sections. <https://devfest.gdgpune.in/>

CERTIFICATIONS

- Certificate of Participation in Level 1: E-Commerce
- Social Summer of Code
- SAWiT.AI Learnathon Program
- Object Oriented Programming in C++ & Interview Preparation
- Java Programming: Complete Beginner to Advanced

COMMUNITY INVOLVEMENT

- Active member of Google Developer Groups (GDG) Pune since September 2024
- Participated in organizing team for GDG DevFest Pune 2024, contributing to event planning and execution
- Collaborated on community tech initiatives and gained experience in event management
